Guust Metz
Software Engineering student

Profile

I am Guust. A driven, active and ambitious software engineering student. I used to be an chemist but due to some unfortunate circumstances I am no longer able to be. However, I still want to continue to contribute to the scientific progress even if it is only from behind a computer instead of from the lab. I will admit, those ambitions are pretty far away now. So until I acquire the necessary skills let's just see what I can do for you!
